

I stand in complete opposition to this proposal to subject my home to these unwelcome, unsolicited, nuisance calls. There are many other ways these institutions can advertise without bombarding my home with incessant phone calls that interrupt meals, family time and other activities that create an aggravation and interruptions. It is the states responsibility and obligation to protect our homes from needless annoyances that we have worked so hard to eliminate. Please act decisively in striking down this proposal to allow these organizations to abuse this technology to disrupt our homes.
